CSIR11 : INTRODUCTION TO COMPUTER PROGRAMMING

Final Assessment Test

Date: 24/12/2025

Time : 3 hours

Answer all the questions.

Max.Marks:40

1. A) Write an algorithm to find the area and perimeter of a circle and draw the flow chart for the same. (5 Marks) ✓

B) Explain the following operators in C language

i) Relational ii) Logical (3 Marks) ✓

C) Write the advantages of using Symbolic constants in C. (2 Marks) ✓

2. A) You are building a simplified ATM interface. The user enters an integer (1-4) to select an action:
1 for Check Balance, 2 for Deposit, 3 for Withdraw, and 4 for Exit.

Write a switch statement that prints the selected action. If the user enters any other number, it should display "Invalid Choice." (3 Marks) ✓

B) Differentiate while and do-while loop. (2 Marks) ✓

C) What is the output for the following code? (1 Mark) ✓

```
#include <stdio.h>

void main() {
    int i = 0;
    while (i < 5) {
        i++;
        if (i == 2)
            continue;
        if (i == 4)
            break;
        printf("\n%d", i);
    }
    printf("\nDone\n");
}
```
