

National Institute of Technology, Trichy

Department of Computer Applications

INTRODUCTION TO COMPUTER PROGRAMMING

Cycle Test II – November 2025

Marks: 15

Date: 27/11/2025

Time : 1 hour

Course Code: CSIR11

Answer all the questions.

- ✓ 1. What are formal arguments? What are actual arguments? what is the relationship between formal arguments and actual arguments? (2 Marks)
- ✓ 2. What is null character? What are its advantages in strings? (2 Marks)
- ✓ 3. Difference between `char str[] = "Hello"` and `char *p = "Hello"` (2 Marks)
4. Explain passing an array to a function and passing a single-valued data item to a function. (4 Marks)
- ✓ 5. Create a structure named Book to store book details like title, author, and price. Write a C program to input details for ten books and display the information using array of structures. (4 Marks)
6. What is the output for the following code? (1 Mark)

```
#include <stdio.h>
int f(int);
void main() {
    printf("%d", f(7));
}
int f(int x)
{
    if(x <= 4)
        return x;
    return f(--x);
}
```

7 <= 4 x
6 <= 4 x
5 <= 4 x
4 <= 4 ✓

-----ALL THE BEST-----
